

Refined Industrial Dry Salt - Technical Data Sheet

Company	Zhangzhou Xinnian Industry & Trade Co., Ltd.		
Product	Refined Industrial Dry Salt (Superior Grade)	Issued	2026-07-01
Reference standard	GB/T 5462-2015 Superior Grade		

Parameter / Typical analysis

Parameter	Standard requirement	Typical analysis
Sodium Chloride (NaCl), dry basis	≥ 99.10%	99.40%
Moisture (H ₂ O)	≤ 0.30%	0.18%
Water Insolubles	≤ 0.05%	< 0.01%
Total Calcium & Magnesium (Ca ²⁺ + Mg ²⁺)	≤ 0.25%	< 0.01%
Sulfate (SO ₄ ²⁻)	≤ 0.30%	< 0.01%

Applications and procurement note

Intended for chlor-alkali, soda ash, textile dyeing and other processes requiring refined industrial dry salt. Bulk delivery or 1000kg/1200kg woven bulk bags may be discussed. Buyers should test compatibility with their process.

These are representative batch values, not a fixed warranty for every delivery. Batch acceptance is based on the shipment COA and contract.
